

- ✓ verified quality memory
- ✓ 5 years warranty  
Warranty details see last page
- ✓ 100% compatible
- ✓ free support on our hotline
- ✓ fast delivery

Memory Specification

|                           |                    |
|---------------------------|--------------------|
| Memory size               | 512MB              |
| Memory technology         | DDR2               |
| ECC support               | no                 |
| JEDEC Norm                | PC2-5300S          |
| Type                      | SO DIMM            |
| Number of pins            | 200 Pin DIMM       |
| Memory data transfer rate | 667MHz @ CL5       |
| Voltage                   | 1,8 Volt           |
| Speciality                | -                  |
| Board dimensions          | 67,6 x 30 (LxB mm) |
| Operating temperature     | 0° C - 85° C       |
| Storage temperature       | -40° C - +95° C    |
| RoHS compliant            | Yes                |
| SKU                       | SP132298           |
| EAN                       | 4055069156973      |

Note: The module specified in this datasheet is one of several possible configurations available under this part number.  
Some details may differ from the specifications described here and the illustration, but have no negative influence on the functionality.

## System Specifications

The memory is 100% compatible with this sytem:

|                                 |                     |
|---------------------------------|---------------------|
| <b>System manufacturer</b>      | Lexmark             |
| <b>Device type</b>              | Printer             |
| <b>Device family</b>            | Color Laser         |
| <b>Device series</b>            | C790 Serie          |
| <b>Device name</b>              | C792dn              |
| <b>Standard memory</b>          | 512MB non removable |
| <b>Maximum memory*</b>          | 1,5GB               |
| <b>Number of memory sockets</b> | 1                   |

\* The specifications for the maximum memory upgrade may differ from those of the manufacturer Lexmark. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.

## Information on memory installation

- Turn off the system
- Remove the plug of the power supply unit (if connected)
- Remove the battery, according to the user manual of the system
- Always ground yourself before touching electronic components
- Protect the memory module from static voltages:
  - Do not touch the gold pins of the memory module
  - Only touch the sides of the memory module
  - Use a grounding strap and/or ESD glove if possible

General installation instructions are supplied by E-Mail.

## Further memory options for Lexmark C792dn

| Size  | SKU      | Technology | Type    | Number of pins | Brand       | Reference no. |
|-------|----------|------------|---------|----------------|-------------|---------------|
| 512MB | SP132298 | DDR2       | SO DIMM | 200 Pin DIMM   | PHS-memory® | 1025042       |

## PHS-memory® warranty

Every PHS-memory® is equipped with a 5-years-warranty of perfect operation. If the RAM module is defective or fails within 5 years of purchase when used properly, you will receive an appropriate RAM module free of charge. If a suitable memory module is no longer available, we will refund the purchase price.
