Your benefits

- ✓ verified quality memory
- ✓ 5 years warranty
Warranty details see last page
- ✓ 100% compatible
- ✓ free support on our hotline
- ✓ fast delivery

PHS-memory® - computer memory with 100% quality

- many years of IT competence
- Free support for optimal configuration and product selection
- High availability through professional warehouse management
- Fast delivery in throughout Europe
- Short response times and professional order processing due to full digitalization throughout the entire process with complete traceability
- Incoming goods inspection include checks of the DRAMs, PCBs and the programmed SPDs in order to exclude possible errors (Controlled BOM).
- PHS-memory® brand memories guarantee 100% compatibility to the specified system.
- PHS-memory® memories can be used together with existing memories in the device - depends on to the configuration rules of the system.
- The "fallback option" in the SPD of PHS-memory® allows DRAMs with higher clock rates to be operated together with older memory modules with lower clock rates within the system.
- Products with unique serial number for service and warranty
- Pre-sales and after-sales support by technically trained personnel

Memory Specification

Memory size	16GB
Memory technology	DDR3
ECC support	yes
JEDEC Norm	PC3-10600R
DRAM Organization	1Gx4
Rank	2Rx4
Type	RDIMM (ECC Registered)
Number of pins	240 Pin DIMM
Memory data transfer rate	1333MHz @ CL9
Speciality	-, DDP
Board dimensions	133,35 x 30 (LxB mm)
Operating temperature	0° C - 85° C
Storage temperature	-40° C - +95° C
RoHS compliant	yes
SKU	SP462807
EAN	4067488263118

overRAMing - maximize your RAM

**overRAMing
Project**

Most systems - including the HP Z600 - can be upgraded with more memory than originally specified by the device manufacturer.

Therefore, our memory specialists continuously analyze new memory solutions in selected systems. Due to improved manufacturing technologies, new memories with higher performance and capacity will be tested for stability and functionality.

Then the new memory solutions are released for the respective systems. Use the benefits of larger computer memory capacity with the PHS-memory® overRAMing memory solutions.

<https://www.phs-memory.fr/-BOR>

Note: The module specified in this datasheet is one of several possible configurations available under this part number.
Some details may differ from the specifications described here and the illustration, but have no negative influence on the functionality.

System Specifications

The memory is 100% compatible with this system:

System manufacturer	HP
Device type	Workstation
Device family	Workstation
Device series	Z600 Serie
Device name	Z600
Standard memory	4GB
Maximum memory*	192GB / 48GB according to manufacturer
Number of memory sockets	6
Annotation	RDIMM and ECC UDIMM dürfen nicht gemischt im server verwendet werden. RDIMM Computer memory werden ab der Board Revision C2 supports. Bios Setup - System Information Menu - Boot Block Date 1/30/09=B3 version (ECC UDIMM) - Boot Block Date 01/07/10=C2 Revision (ECC UDIMM and RDIMM)

* The specifications for the maximum memory upgrade may differ from those of the manufacturer HP. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.

Memory modules with our overRAMing-symbol are approved by us for maximum memory expansion.

Information on memory allocation

Note when selecting the memory modules

RDIMM Computer memory können erst ab der mainboard-Revision C2 (Intel 5520 Chipsatz) verwendet werden.

So erkennen Sie, ob Sie ein mainboard with einer C2 Revision besitzen:

- Starten Sie das BIOS Setup Menü. Im Punkt System Information Menu wird das Boot Block Date angezeigt
- Zeigt das Boot Block Date das date 01/07/10, handelt es sich um eine C2 Revision
- Zeigt das Boot Block Date das date 01/30/09, handelt es sich um ein B3-based System

Alternativ können Sie auch die HP Performance Advisor Software verwenden. Hier finden Sie die Informationen unter System Configuration and Baseboard ID angezeigt.

- Alle B3-based Systeme haben hier den Wert: 0AE8h
- Das System with der C2 Revision hat hier den Wert: 0B54h

RDIMM and ECC UDIMM dürfen nicht gemischt verwendet werden.

Information on memory installation

- Turn off the system
- Remove the plug of the power supply unit (if connected)
- Remove the battery, according to the user manual of the system
- Always ground yourself before touching electronic components
- Protect the memory module from static voltages:
 - Do not touch the gold pins of the memory module
 - Only touch the sides of the memory module
 - Use a grounding strap and/or ESD glove if possible

General installation instructions are supplied by E-Mail.

Further memory options for HP Z600

Size	SKU	Technology	Type	Number of pins	Brand	Reference no.
4GB	SP102935	DDR3	UDIMM ECC (ECC unbuffered)	240 Pin DIMM	PHS-memory®	NL797AA
8GB	SP148937	DDR3	RDIMM (ECC Registered)	240 Pin DIMM	PHS-memory®	FX622AA
8GB	SP332975	DDR3	UDIMM ECC (ECC unbuffered)	240 Pin DIMM	PHS-memory®	
16GB	SP462807	DDR3	RDIMM (ECC Registered)	240 Pin DIMM	PHS-memory®	
32GB	SP462808	DDR3	RDIMM (ECC Registered)	240 Pin DIMM	PHS-memory®	

PHS-memory® warranty

Every PHS-memory® is equipped with a 5-years-warranty of perfect operation. If the RAM module is defective or fails within 5 years of purchase when used properly, you will receive an appropriate RAM module free of charge. If a suitable memory module is no longer available, we will refund the purchase price.
