

## 128GB Computer memory DDR4 for MSI Godlike Gaming X99A RDIMM 3DS

# Your benefits ✓ verified quality memory ✓ 5 years warranty Warranty details see last page ✓ 100% compatible ✓ free support on our hotline ✓ fast delivery

#### PHS-memory® - computer memory with 100% quality

- many years of IT competence
- Free support for optimal configuration and product selection
- High availability through professional warehouse management
- Fast delivery in throughout Europe
- Short response times and professional order processing due to full digitalization throughout the entire process with complete traceability
- Incoming goods inspection include checks of the DRAMs, PCBs and the programmed SPDs in order to exclude possible errors (Controlled BOM).
- PHS-memory® brand memories guarantee 100% compatibility to the specified system.
- PHS-memory® memories can be used together with existing memories in the device depends on to the configuration rules of the system.
- The "fallback option" in the SPD of PHS-memory® allows DRAMs with higher clock rates to be operated together with older memory modules with lower clock rates within the system.
- Products with unique serial number for service and warranty
- Pre-sales and after-sales support by technically trained personnel

#### Memory Specification

| Memory size               | 128GB                      |
|---------------------------|----------------------------|
| Memory technology         | DDR4                       |
| ECC support               | yes                        |
| JEDEC Norm                | PC4-23400-R                |
| DRAM Organization         | 3DS 2H 8Gx4                |
| Rank                      | 4Rx4 (2S2Rx4)              |
| Туре                      | RDIMM (ECC Registered) 3DS |
| Number of pins            | 288 Pin DIMM               |
| Memory data transfer rate | 2933MHz @ CL21             |
| Voltage                   | 1,2 Volt                   |
| Speciality                | 3DS                        |
| Board dimensions          | 133,35 x 31,25 (LxB mm)    |
| Operating temperature     | 0° C - 85° C               |
| Storage temperature       | -40° C - +95° C            |
| RoHS compliant            | yes                        |
| SKU                       | SP464149                   |
| EAN                       | 4067488276521              |
|                           |                            |

### overRAMing - maximize your RAM

Most systems - including the MSI Godlike Gaming X99A - can be upgraded with more memory than originally specified by the device manufacturer.

Therefore, our memory specialists continuously analyze new memory solutions in selected systems. Due to improved manufacturing technologies, new memories with higher performance and capacity will be tested for stability and functionality.

Then the new memory solutions are released for the respective systems. Use the benefits of larger computer memory capacity with the PHSmemory® overRAMing memory solutions.

https://www.phs-memory.fr/-BOR

Note: The module specified in this datasheet is one of several possible configurations available under this part number.

Some details may differ from the specifications described here and the illustration, but have no negative influence on the functionality.

#### System Specifications

The memory is 100% compatible with this sytem:

| System manufacturer      | MSI                                   |  |  |
|--------------------------|---------------------------------------|--|--|
| Device type              | Motherboard-memory                    |  |  |
| Device family            | Godlike Gaming                        |  |  |
| Device series            | X99A Serie<br>Godlike Gaming X99A     |  |  |
| Device name              |                                       |  |  |
| Maximum memory*          | 2TB / 512GB according to manufacturer |  |  |
| Number of memory sockets | 8                                     |  |  |

<sup>\*</sup> The specifications for the maximum memory upgrade may differ from those of the manufacturer MSI. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.

Memory modules with our overRAMing-symbol are approved by us for maximum memory expansion.

#### Information on memory allocation

#### Which memory configuration is possible?

#### memory for Core i7 5th Generation CPU:

- Optimal performance is achieved by 4 or 8 identical memories per CPU.
- If an i7 processor is used, UDIMM memory modules must be installed.

#### memory for Xeon CPU:

- When using an XEON CPU, ECC and RDIMM memory must be used.
- The device supports ECC DIMM (with error correction code) or RDIMM (Registered DIMM) RAM memories. RDIMM memories are recommended when large memory capacities are to be achieved.
- The different memory technologies (ECC / RDIMM) may not be mixed.
- If a memory expansion is to be made with the already existing RAM memories, it must be checked which memory technology (ECC/ RDIMM) is already installed in the system.

| CPU im System   | UDIMM      | UDIMM ECC     | RDIMM     |
|-----------------|------------|---------------|-----------|
|                 |            |               |           |
| Core i7-5960X   | 4GB UDIMM  |               |           |
| Core i7-5930K   | 8GB UDIMM  |               |           |
| Core i7-5820K   | 16GB UDIMM |               |           |
|                 | 32GB UDIMM |               |           |
|                 |            |               |           |
| Xeon E5-1600 v3 |            | 8GB UDIMM ECC | 8GB RDIMM |

#### Product Datasheet | SP464149 128GB Computer memory for Godlike Gaming X99A

| Xeon E5-2600 v3 |  | 16GB RDIMM      |  |
|-----------------|--|-----------------|--|
|                 |  | 32GB RDIMM      |  |
|                 |  | 64GB RDIMM DDP  |  |
|                 |  | 128GB RDIMM 3DS |  |
|                 |  | 256GB RDIMM 3DS |  |

#### Information on memory installation

- Turn off the system
- Remove the plug of the power supply unit (if connected)
- Remove the battery, according to the user manual of the system
- Always ground yourself before touching electronic components
- Protect the memory module from static voltages:
  - Do not touch the gold pins of the memory module
  - Only touch the sides of the memory module
  - Use a grounding strap and/or ESD glove if possible

General installation instructions are supplied by E-Mail.

#### Further memory options for MSI Godlike Gaming X99A

| 4GB         SP159615         DDR4         UDIMM (Non-ECC unbuffered)         288 Pin DIMM         PHS-memory®           8GB         SP159616         DDR4         UDIMM (Non-ECC unbuffered)         288 Pin DIMM         PHS-memory®           8GB         SP159613         DDR4         RDIMM (ECC Registered)         288 Pin DIMM         PHS-memory®           8GB         SP159610         DDR4         UDIMM ECC (ECC unbuffered)         288 Pin DIMM         PHS-memory®           16GB         SP159614         DDR4         UDIMM (Non-ECC unbuffered)         288 Pin DIMM         PHS-memory®           32GB         SP160766         DDR4         RDIMM (ECC Registered)         288 Pin DIMM         PHS-memory®           32GB         SP159612         DDR4         RDIMM (ECC Registered)         288 Pin DIMM         PHS-memory®           32GB         SP307669         DDR4         UDIMM (Non-ECC Qunbuffered)         288 Pin DIMM         PHS-memory®           64GB         SP464148         DDR4         RDIMM (ECC Registered)         288 Pin DIMM         PHS-memory®           128GB         SP464149         DDR4         RDIMM (ECC Registered)         288 Pin DIMM         PHS-memory®           28GB         SP464150         DDR4         RDIMM (ECC Registered)         288 Pin DIMM <th>Size</th> <th>SKU</th> <th>Technology</th> <th>Туре</th> <th>Number of pins</th> <th>Brand</th> <th>Reference no.</th> | Size  | SKU      | Technology | Туре | Number of pins | Brand       | Reference no. |

#### PHS-memory® warranty

Every PHS-memory® is equipped with a 5-years-warranty of perfect operation. If the RAM module is defective or fails within 5 years of purchase when used properly, you will receive an appropriate RAM module free of charge. If a suitable memory module is no longer available, we will refund the purchase price.

For more information on warranty and service please visit https://www.phs-memory.fr/-W5Y
