## System Specifications

The memory is 100% compatible with this system:

<b>System manufacturer</b>	Synology
<b>Device type</b>	Storage/NAS
<b>Device family</b>	DiskStation
<b>Device series</b>	DS700 Serie
<b>Device name</b>	DiskStation DS718+
<b>Standard memory</b>	2GB (1x2GB)

<b>Number of memory sockets</b>	2
<b>Annotation</b>	If you want to use both memory slots, you have to install a memory kit of two identical memory modules. A combination of different capacities is not possible.

\* The specifications for the maximum memory upgrade may differ from those of the manufacturer Synology. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.

## Information on memory installation

- Turn off the system
- Remove the plug of the power supply unit (if connected)
- Remove the battery, according to the user manual of the system
- Always ground yourself before touching electronic components
- Protect the memory module from static voltages:
  - Do not touch the gold pins of the memory module
  - Only touch the sides of the memory module
  - Use a grounding strap and/or ESD glove if possible

General installation instructions are supplied by E-Mail.
