## System Specifications

The memory is 100% compatible with this sytem:

System manufacturer	HP		
Device type	Server		
Device family	ProLiant		
Device series	DL360 Serie		
Device name	ProLiant DL360e Gen8 (G8)		
Maximum memory*	384GB		
Number of memory sockets	12		
Annotation	ECC UDIMM, RDIMM and LR DIMM können nicht gemischt im server verwendet werden. Mit ECC UDIMM maximal 96GB, RDIMM maximal 192GB, LR DIMM maximal 384GB.		

\* The specifications for the maximum memory upgrade may differ from those of the manufacturer HP. Often the information given in the manual for the maximum memory upgrade is not up to date. New memory technologies, bios updates or newer software versions often allow the use of memory modules with a higher capacity than specified by the manufacturer with the same performance and stability.

## Information on memory allocation

#### Which memory configuration is possible?

Our memory team will be happy to help you choose the right memory and configure your server.

Technologie	12 memory Slot		
UDIMM ECC	48GB RAM (12 x 8GB UDIMM ECC)		
RDIMM	192GB RAM (12 x 16GB RDIMM)		
LRDIMM	384GB RAM (12 x 32GB LRDIMM)		

ECC DIMM, Registered DIMM and Load Reduced LRDIMM memory modules must not be mixed. You should therefore know which memories already exist, when you want to upgrade.

## Information on memory installation

- Turn off the system
- Remove the plug of the power supply unit (if connected)
- Remove the battery, according to the user manual of the system
- Always ground yourself before touching electronic components
- Protect the memory module from static voltages:
  - Do not touch the gold pins of the memory module
  - Only touch the sides of the memory module
  - Use a grounding strap and/or ESD glove if possible

General installation instructions are supplied by E-Mail.
